

Coast Village Greenbelt Committee Report

7/16/2016 Annual Meeting

Submitted by Glenn Singley – Chairperson

1. The GBC has currently completed 8 projects and has 5 more on the schedule. Projects have ranged from small (planting a couple of bushes) to very large (planting 20+ bushes/trees, repair an existing irrigation system and install a new one), to general greenbelt cleaning and large blackberry extractions.
2. The GBC would like to thank the POM for donating usage of a storage shed for our supplies and recyclables.
3. At this point in time the GBC is funding itself through nickle deposit recycle cans & bottles and private donations from lot owners. As of July 7, 2016 we have recycled 4,857 bottles and cans for \$242.85 and received personal donations of \$625.00. After expenses of \$223.20 we have a balance of \$644.65 to purchase planting medium, soil enhancers, watering supplies, brush disposal, etc.
4. The GBC wants to thank the residents of Coast Village for financial donations and their donation of bottles and cans. We ask that recyclables be placed in the recycle trash cans located in the laundry room, exercise area, and outside the bathroom area in the clubhouse, or dropped off at the office. If anyone has a large amount, they can contact me and we'll make arrangements to pick them up. Please do not put them in the large recycle bins so I can reduce my dumpster diving frequency.
5. We would also like to thank the people who have donated plants to us for use on our projects.
6. We are looking for more volunteers to help us out on projects as well as more GB projects to work on. Interested people can contact me or the office staff.
7. Just a reminder that the GBC meets every 4th Thursday at 3:00 PM in the conference room and anyone can attend.
8. Please check out the GBC web page. There is a wealth of information to help people with a lot of different situations and information about our projects.
